ABOUT

I'm a passionate full-stack developer who builds the best digital experiences that exceed client expectations. With over 7 years of experience, I:

- Possess a proven ability to creatively meet a clients functionlaity requirements
- Establish Development best practices and implement them throughout the organization
- Prioritize and direct work among the development team to achieve milestones and launch products
- Collaborate with senior-level clients to create high-quality digital solutions
- Facilitate sketch sessions with the UX and creative teams to create, test and refine solutions resulting in highly functional prototypes

PROFESSIONAL EXPERIENCE

SCOUT, Senior Developer | 2014 - Present

- Increased efficiency and reduced cost by introducing a modern development workflow which resulted in tighter collaboration across the UX, creative and development disciplines
- Managed and recommended hosting resulting in more efficient workflows and implimentation for HIPAA and non HIPAA digital projects
- Grew team's allocation by partnering with key internal stakeholders and implemented development best practices across all digital projects
- Managed multiple FTEs and off-site contract resources including third party developers and hosting services, data services and Database Architects
- Assists with new business pitches, RFP and RFI processes
- Lead client technical assessments and technology audits & research
